Nagpur, Maharashtra, India

Summary

I'm an aspiring Full Stack Developer and AIML enthusiast, currently pursuing a B.Tech in Electronics and Computer Science in third year at RCOEM, Nagpur maintaining GPA of 9.44. With a strong foundation in both software and hardware, I'm passionate about building smart, efficient, and user-focused digital solutions.

During my 3 month internship at AARA, Green Info Solutions Pvt. Ltd., I contributed to real-world projects involving full-stack development, including a responsive webpages with ReactJS, Supabase, and ExpressJS.

My long-term goal is to work at the intersection of software development, AI/ML, and embedded systems—creating intelligent systems that automate tasks and enhance human capabilities. I enjoy learning through hands-on projects, collaborating in tech clubs, and exploring how technology can make everyday life smarter. Outside of tech, I enjoy music, watching movies, and meaningful conversations that spark new ideas.
